50X1-HUM

As already mentioned, the soldiers who are employed in the establishments are paid daily according to the "norm" of 20 dinars for a full day's work.

For work done beyond this normal working day, they are recompensed according to the normal base used for the other workers.

However, it is rumored that such recompense for ^{overtime} ~~extra work~~ will no longer be paid.

Ships repaired in the shipyard

The shipyard, *in view of the great amount of work at* ~~given the great work of the~~ Shipyard 3 Maggio, is ~~not of~~ *important* assistance.

The following have been repaired:

Aug. 1950 the warship "SPLIT".

This remained in the shipyard about 10 days.

Work executed: change of 13 plates in the ~~low~~ *low* zone.

The work was done twice because it was poorly done the first time, and more precisely, because in putting on the new plates, rivets were used which were not adapted to the work, that is, their heads were so badly countersunk that the result was defective.

The maritime commission therefore ordered it to be done over using more suitable material.

When the work on the "SPLIT" was finished it was brought back to "Shipyard 3 Maggio"

Dec. 1950 The following ships were being worked on at the time indicated ~~at the~~ margin:

-the former merchant ship "ASTERINA" of about 2000 tons recovered from the sea bottom after it had been bombarded.

50X1-HUM

Work to be done:

change 30 plates on the keel.

This ship also has been transferred to the shipyard of "3 Maggio" an auxiliary ship, ~~undetermined~~ *unidentified*, of the navy was about to leave the shipyard ~~for final~~ *after being* repaired.

SECRET

During the storm along the coast of DALMATIA in the month of
December, 1950 the following ^{small coastal} merchant ships were damaged:

(~~close to shore coasting trade ships~~):

- "POMORAK": keel badly torn besides 3 broken plates in the ^{stern} ~~bow~~.
- "KLIN": is to enter the basin to repair the damages suffered
from being stranded on the rocks. Supported by 2
barges on each side and held on the surface by means of
by continually ^{of the} pumping out ~~its~~ water.
